

ONLINE BANKING ALERTS

Alerts let you stay informed - anytime, anywhere.

Monitor activity on your accounts via email, phone or text** message. With Online Banking Alerts, you decide what alerts are important to you and when* and how you receive them.

Account Alerts* (current balance alerts delivered after the nightly update)

Monitor your account balances, current available, etc.

History Alerts*

Monitors transactions on your account (transactions must post to account, pending transactions or holds will not trigger an alert).

Know when your direct deposit posts | Track your debit card transactions | And more

Date Alerts*

Date alerts can be sent to remind you of important dates, such as payment due dates, birthdays, etc.

Security Alerts*

A variety of automatic Security Alerts advise you of important activity with your online banking, such as password, login or challenge code changes. Security alerts are automatically sent to your primary email address and to your Online Banking Secure Messages. These alerts are also available as text messages or phone messages. Other Security Alerts may be chosen in addition to those you receive automatically.
